VI. Horizon Europe Cluster 1 Health info days and brokerage events .....	3
VII. Swiss National Science Foundation open calls .....	3

#### **I. The Young Academy of Europe, in collaboration with the AE Budapest Hub, presents its new mentoring event for ERC Starting Grant applicants**

The event series aims to boost the performance of EU13 applicants for ERC calls

Started by the Young Academy of Europe back in September 2020, the mentoring event series aimed at young researchers having the ambition to apply to an ERC Grant call (typically a Starting Grant) has been a great success in the virtual arena of mentoring and grant application training events. Organized in collaboration with the Academia Europaea Budapest Knowledge Hub, the third event will take place - again online - on May 31<sup>st</sup>, 2023, from 15:00 to 16:20 hrs (CET). The focus will now be on narrative CVs and the evaluation of ERC applications.

The AE Budapest Hub is pleased to announce that its Scientific Director, Professor László Lovász, who is currently also a member of the Scientific Council of the European Research Council, will take questions from the online audience of the event and will give his closing remarks at the end.

#### **II. Science & SciLifeLab Prize is open for applications**

Recent PhD? Boost your career by applying to the Science and SciLifeLab's Prize for young scientists, an annual prize awarded to early-career scientists, this year celebrating its 10th anniversary

Applicants will submit a 1000-word essay that is judged by an independent editorial team, organized by the journal Science. Essays are assessed on the quality of research and the applicants' ability to articulate how their work would contribute to the scientific field.

The prize is presented in four categories:

- Cell and Molecular Biology
- Ecology and Environment
- Molecular Medicine
- Genomics, Proteomics and Systems Biology

If selected as a winner, you will have your essay published by Science, win up to USD 30,000 and be invited to Sweden during our 10th anniversary celebration to receive your prize, present your research and meet with leading scientists in your field.

### III. New Interregional Innovation Investments (I3) Instrument calls are out!

The European Commission launched two new Interregional Innovation Investment (I3) Instrument calls on 17 May 2023, with a budget of EUR 62 million. These calls are open to consortia of applicants from private organisations (SMEs, start-ups), public institutions and academia (universities, research organisations).

The I3 Instrument aims to foster interregional collaboration. It targets consortia of innovation actors, promoting coordinated investments to strengthen existing or new value chains. It is focused on bringing innovations to a mature level, ready for commercialisation and scale-up, with a particular aim to develop new value chains in less developed regions and to integrate them into the broader EU value chains.

### IV. Scholarship for two-week innovation and science diplomacy training at the University of Sao Paolo

The Science and Innovation Diplomacy (InnSciD SP) School on Global Circulation of Research Data, funded by the São Paulo School of Advanced Science Programme of FAPESP (<http://espca.fapesp.br>), will take place at the University of São Paulo in Brazil from 24 July to 04 August 2023.

This call for proposals aims to select up to 80 researchers for The Science and Innovation Diplomacy (InnSciD SP) School on Global Circulation of Research Data. There are up to 40 places available for international participants and 40 places available for participants from Brazil. The main target group for the school is students enrolled in master's, doctoral or postdoctoral programmes who are interested in the topics covered by the school. **Register until 31 May 2023.**

### V. Industry 5.0 Award contest opens: apply by 1 September 2023

The Commission launched the Industry 5.0 Award dedicated to EU-funded projects whose results make European industry more human-centric, resilient and sustainable. The award has been prepared in collaboration with European Factories of the Future Research Association (EFFRA), the industrial platform ManuFUTURE, European Institute of Innovation and technology and the European Innovation Council and SMEs Executive Agency.

Eligible projects must have obtained funding from Horizon 2020, Horizon Europe or the European Institute of Innovation and Technology. Projects involving deep-tech start-ups are particularly encouraged to participate. The official start date of the project must be after 31 August 2018 and the projects' progress to date, and results should have clear application in industry. The deadline for submission is 1 September 2023 – 17:00 CET (Brussels time).
